

# ProxPass® Active Tag

125 kHz Proximity

Long Range Proximity for Vehicle Access Control • 1351

**ACCESS** reliability.

## Application

The ProxPass® is an active tag specifically designed for vehicle access control. Providing convenient access control for parking and fleet management applications, ProxPass is an ideal augmentation to an existing or new HID proximity installation. It can be encoded with any HID format and numbering system used by HID proximity cards, including the Corporate 1000 format.

## Features

- ▶ Provides a four to eight foot read range.
- ▶ Velcro backing attaches easily to interior of vehicle windshield.
- ▶ Attractive, durable sealed case.
- ▶ Compatible with MaxiProx® reader and all HID card formats.
- ▶ Two to five year battery life, depending on usage.
- ▶ Competitively priced as compared to VHF vehicle tags.

## Features

<b>Description</b>	RF-programmable, customer specified ID numbers
<b>Options</b>	External card numbering
<b>Easily Administered</b>	A cross-reference list correlating the external card number and the programmed ID number provides easy system administration.
<b>Security</b>	Offers over 137 billion unique codes.
<b>Long Life</b>	Dual battery design and low current draw allows two to five years with typical usage.
<b>Durability</b>	Rugged, UV-resistant, sonic-welded polycarbonate case is also weather resistant
<b>Warranty</b>	Lifetime warranty against defects in materials and workmanship (see complete sales policy for details).

## Specifications

### Typical maximum\* read range using MaxiProx® reader

4 feet (1.27m) to 8 feet (2.5m)
