

BioEntry Plus

Fit to your space.

Compact and elegant design

Easy to fit to your narrow space with elegant and look innovation

Easy operation and management

User friendly operations. Command cards for on-device user edit (add/delete) with many RFID card reader options.

Fast and accurate fingerprint identification

Award winning fingerprint algorithm
1 : 2,000 fingerprint identification in 1 second

Distributed IP Access Control System

Provide both reader and controller functionalities in one device. One device can scan ID data, manage users and control access from the edge of a system.

Specification

User Capacity	• 5,000
Log Capacity	• 50,000
CPU	• 533MHz DSP
Memory	• 8Mb Flash + 8MB RAM
Sound & Interface	• Multi-color LED and multi-tone buzzer
Network Interface	• TCP/IP, RS485, RS232
Wiegand	• input or output (switchable)
TTL I/O	• 2 x input
Relay	• 1 x output
Operating Temp.	• - 20°C ~ 50°C
Dimension (mm)	• 50(W) x 160(H) x 37(D)
